

R200

Product Description:

R200 is an EPS class which can be used in production of EPS foam in density ranges between 12-25 kg/m³ suitable for high quality block molding with a section thickness of 15 mm and higher.

Application:

R200 is used for cases and packaging product suitable for food contact, insulation applications is not requiring fire classification.

Lower densities can be achieved after multiple expansion stages.

Bead size - Diameter	0.9-1.4 mm
Blowing agent - pentane	>5.8%
Residual styrene monomer	Less than 1000ppm
Moisture content	Less than 0.4 %
CFC content	Nil
Density	12-25 kg/m ³

All above mentioned data are typical values and not to be construed as real specifications. Users should confirm results by their own tests.
